

LIMITED LIFETIME CRAFTSMANSHIP WARRANTY

This warranty reflects our history of superior craftsmanship, customized design, company integrity, and, most importantly, dedication to our customers. This warranty is our promise to you that we stand behind our products and services.

GCS Glass & Mirror warrants our products against defects in materials and workmanship under normal use for as long as it is owned by the original purchasing business or consumer. This warranty is non-transferable, unless otherwise specified.

If a defect occurs and a valid claim is received, GCS Glass & Mirror, at its sole discretion, will either repair or replace the defective product free of charge. If a claim is deemed valid, the decision whether to repair or replace is determined by GCS Glass & Mirror. Proof of purchase must be provided along with all warranty claims.

Exclusions & Limitations

1. This warranty only applies to products, installations, or services rendered after January 1, 2016.
2. The warranty only applies to products, installations, or services purchased through GCS Glass & Mirror.
3. GCS does not warranty glass or hardware breakage, surface scratches or scuffs once the product is installed or carried out of the building, unless authorized by GCS, at its sole discretion.
4. On rare occasions, tile may break and/or crack when drilling holes. There is no warranty against tile breakage. If tile breaks, install will stop and the customer will be notified immediately. Breakage of tile, specifically when drilling, reflects the quality of the tile installation, not the workmanship or products of GCS. It is the customer's responsibility to have tile replaced.
5. A frameless shower is made to deflect water, not retain it. If a completely waterproof solution is desired, a frameless shower is not suggested.
6. This warranty does not apply to defects or damages caused by non-GCS glass or hardware, product abuse, product misuse, improper care/cleaning, non-GCS repairs/installations, movements/transfer of GCS glass or hardware from its original installation location, or natural disaster.
7. Products may experience changes in appearance due to normal wear and tear. Normal wear and tear is not a defect and is not covered by this warranty. Information on proper care and maintenance can be found on Page 2.
8. Hydrophobic nano-coating treatments come with their own implied manufacturer's warranty. GCS Glass & Mirror is not liable for any nano-coating defects. All issues must be taken to the manufacturer directly.
9. Per ASTM standards regarding blemishes in glass – glass needs to be viewed from a 10-ft distance in natural, not direct, light. If blemishes are still apparent, there should be cause for remakes.
10. Shower panes over 108" in height or width are not warrantied for bowing. Mirrors over 60x96" are not warrantied as larger sizes are not recommended due to distortion.

Claims

To submit a claim, contact your local GCS Glass location. Business hours vary by location.

GLASS & SHOWER MAINTENANCE

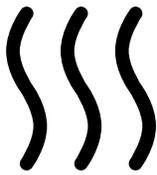

Please note, acid etched/frosted glass is extremely susceptible to fingerprints and spotting due to the oil on your hands and other environmental factors such as steam.

WAIT BEFORE FIRST USE

If silicone was used on your project, give your silicone at least 24 hours to completely dry before first use.

DAILY MAINTENANCE

Crack your door after use or keep a squeegee handy to dry the inside of the shower to help with mold/mildew buildup.

If your bathroom has a vent fan, use it when showering to keep the area as dry as possible.

Wipe away moisture from your mirrors to maximize the life of the silver backing.

ROUTINE CLEANING

Never use aggressive cleaning materials (razorblades, steel wool, abrasives, etc.) to clean glass.

Always use non-ammonia glass cleaner and/or alcohol to clean glass.

Never use products containing hydrofluoric acid, fluorine, chlorine, or ammonia derivatives. They can damage the surface of the glass.

Always clean the full surface of the glass. Spot cleaning might create halos.

Never try to remove impurities with a dry or dirty cloth, as this may cause scratches or scuffs on the glass surface.
